SUMMARY

Final-year engineering student at ESME (Master's-level engineering degree, Big Data & Digital Marketing). Data experience at Renault Trucks (time-series clustering, Streamlit, Power BI, SQL on Databricks) and award-winning innovation projects. Seeking an end-of-studies internship abroad to build strategic and analytical skills and develop marketing expertise, leveraging a strong data background.

PROFESSIONAL EXPERIENCE

Data Scientist Intern — Renault Trucks

June 2026 – October 2026

Data Science application for thermal simulations

- Developed a Streamlit application for K-Means clustering of weather time series using tslearn, supporting thermal simulations.
- Integrated weather data sources, built interactive visualizations (Plotly) and implemented results export.

Power BI & Data Analytics

- Migrated and optimized 4 Power BI dashboards tracking engine part performance over time, used by Quality and Development engineering teams to improve after-sales service and guide development work.
- Rebuilt and optimized SQL tables and queries on Databricks.
- Built a team website driven by CSV data files, hosted on GitHub Pages.

Tech stack: Python, Pandas, tslearn, Plotly, Streamlit, Power BI, SQL, Databricks

Management & Organizational Support Intern — Renault Trucks

June 2025 – July 2025

- Designed an educational game and a career guide booklet to promote Renault Trucks jobs to high-school students.
- Managed schedules, coordinated the team and organized internal events.
- Supervised a group of 40 high-school students.

ACADEMIC & PERSONAL PROJECTS

- Jackars – Marketing & Data Marketing Strategy (2026):** strategy for a premium car brand: market analysis, benchmark (Alpine, Ferrari, Tesla), PESTEL, segmentation-targeting-positioning, 4P, customer journey, SEO benchmark (Ahrefs), CRM and marketing automation.
- Data projects (group, 2026):** retail sales analysis (Power BI dashboard, Streamlit app, strategic recommendations); diabetes prediction with 4 classification models (AdaBoost: 75% accuracy), association rules and clustering.
- Istanbul Quest (personal project, 2026):** event web app designed and built solo: mini-games, team scoring, admin panel and awards ceremony (Next.js, TypeScript, Firebase).

PROJECTS & AWARDS

- Innovatech Challenge 2025 – Finalist (1st place nationally):** Stork, an all-female tech project on tourism and mobility, presented at the French Ministry of the Economy.
- RISE – CEO & Co-founder (student project, since 2024):** international student mobility web platform. Designed the product and its features, built the back end and database, developed the project network and a partnership with ESME's international office, registered the trademark with INPI. Winner of IONIS Innovation 2025 and ESME Advent Calendar 2024.
- “Galets du Rhône” Competition 2025 – 2nd place (Switzerland/France):** funded entrepreneurial project, pitched to a cross-border jury.
- Rou’cool – IONIS Goodwills 2025 Winner:** suitcase with retractable wheels.

EDUCATION

ESME — Master of Engineering (Diplôme d'ingénieur), Big Data & Digital Marketing, Paris

2022 – 2027

Brno University of Technology (VUT) — Exchange semester, Czech Republic

2025

SKILLS

Languages: Python, SQL, TypeScript, JavaScript, HTML/CSS

Data & Machine Learning: Pandas, scikit-learn, tslearn, classification, clustering (K-Means, hierarchical), time series, association rules

Data Visualization: Power BI, Plotly, Streamlit

Marketing: marketing strategy, segmentation-targeting-positioning, marketing mix (4P), customer journey, CRM, marketing automation, SEO, Google Analytics

Tools: Databricks, Next.js, React, Firebase, Git, GitHub, Ahrefs, Microsoft Office, Canva

Spoken Languages: French (native), English (B2), German (B1)

Activities: 10 years of competitive gymnastics (French national championships, 2 medals); gymnastics judge and coach; university volleyball referee.
